EDUCATION

Jabalpur Engineering College **08 2022 – Present**
Master's of Computer Application *Jabalpur, India*

Aryansh Group of Arts and Management **07 2019 – 06 2022**
Bachelor of Science *Gwalior, India*

TECHNICAL SKILLS

- Security Mindset
- Incident Response
- SIEM Tools
- Packet Sniffers
- Steganography
- Intrution Detection
- Network Traffic
- Data Escalation
- Risk Management
- Log Analysis
- Vulnerability assessment

PROJECTS

Text-Hider ⬀ | Python, Steganography, Cryptograghy, Git, Cypher **10 2023 – 11 2023**
- A project that can hide text inside the image. The text will be encrypted inside the image and can't be seen by the normal viewer. To view the text hidden inside the image, it have to be decrypted by this project. **Feature like - Text Encryption and Decryption inside of the image.**

AI Image Generator ⬀ | Javascript, Node.js, Tailwind, Mongo DB, OpenAI API Key **06 2023 – 09 2023**
- The innovative model demonstrated significant improvements in generating high-resolution and realistic images. With the use of openai api key the model is able to create the image as told in the prompt. **Implemented a user-friendly customization interface that empowers users interactively.**

EXPERIENCE

IBM (Edunet Foundation) **09 2023 – 11 2023**
Security Analyst *Remote, India*
- Implementation of cipher text into programming language using Python so that it can be used for text encryption. Use of the concept of Steganography in implementing of the project algorithm. **learned new technologies like Incident Response, Network Security, Encryption and Authentication.**

PHN Technology **04 2023 – 05 2023**
Software Tester *Remote, India*
- Creation of the test cases and after all the test cases were made report those test cases to the developer, Finding the bugs and issues in the software that were given by the company. **Implementation of test cases in excel and the concept of the manual testing.**

InternPe **07 2023 – 08 2023**
Web Developer *Remote, India*
- Creation of Web Pages and finding bugs in the given website so that it can run normally. Creation of Commerce Websites with better and optimised website with quick response and sophisticated dashboard. **Implementation in project using different web technologies to make the project more optimised and moresophisticated.**
